Total Points

86 / 110 pts

Question 1

Expectations

12.5 / 15 pts

- ✔ **+ 15 pts** Full Credit
- **– 5 pts** Missing Time Commitment
- **– 5 pts** Missing Punctuality Policy
- **– 5 pts** Missing Absence/Emergency Policy.
- **– 3 pts** Vague Definitions
- ✔ **– 2.5 pts** Missing specifics for punctuality
- **– 2.5 pts** Missing specifics for unexpected commitments
- **– 2.5 pts** Missing specifics for time commitment

Be a bit more specific. If one person is running 5 minute late, is it counted as not on time? 15 minutes late? If one person is late for three consecutive times, what would you do? Or would you intervene at the 10th time?

This is a 12 unit class. 5-7 hours a week may not be enough time to get all your work done, but 10-12 is too many! Please try to work at a sustainable pace throughout the entire semester. Your app is not a game. No death marches, please!

Question 2

Communication

15 / 15 pts

- ✔ **+ 15 pts** Full Credit
- **– 5 pts** Missing Platform
- **– 5 pts** Missing Response Time (SLA)
- **– 5 pts** Missing "Ghostbuster" Protocol
- **– 2 pts** Notification Check.
- **– 2.5 pts** Missing specifics of response time

interesting split between weekday and weekend response times. good that Kester is on ghostbuster duty!

12 hours is a long time to expect a response if you're writing near an assignment deadline (usually Thursday nights). Maybe have a different policy for more critical times of the semester?

Question 3

Meeting Schedule

7 / 15 pts

- ✔ **+ 15 pts** Full Credit
- ✔ **− 8 pts** Missing Schedule Strategy
- **− 7 pts** Missing Modality

you mention meeting once per week for 1 hour but haven't locked in a specific day, time, or location yet. please find a recurring slot so you don't have to scramble each week. When you have settled this, please update the team contract and email it to your TA.

Additional meetings near deadlines will *definitely* be needed.

Question 4

Responsibilities

16.5 / 20 pts

- ✔ **+ 20 pts** Full Credit
- **− 7 pts** Missing Task Division
- **− 7 pts** Missing Meeting Roles
- **− 6 pts** Missing Doc Storage
- ✔ **− 3.5 pts** Missing specifics of task division

good job covering meeting roles and Google Drive. the frontend/backend repo split is a nice call. unclear which team members will own which parts though. who's doing frontend vs backend vs ML?

Question 5

Equitable Contribution and Conflict Resolution

20 / 20 pts

- ✔ **+ 20 pts** Correct
- **− 7 pts** Missing "Work While Fighting"
- **− 7 pts** Missing Under-Performance Steps
- **− 6 pts** Missing Discussion Steps

solid escalation steps. I like that you explicitly address irresolvable conflicts. using written updates to avoid direct confrontation is a good call

Question 6

Signatures of All Team Members

10 / 10 pts

- ✔ **+ 10 pts** Full Credit
- **− 10 pts** Missing Signatures
- **− 3 pts** Format Issues

cool signatures

Question 7

Extra Credit

0 / 0 pts

+ 10 pts Photo of team bonding activity posted in Slack team channel or submitted as part of the assignment.

✔ **+ 0 pts** No photo.

Question 8

Access granted to team's Slack channel

5 / 5 pts

✔ **+ 5 pts** Correct

Question 9

Access granted to team's Github repo

Resolved **0** / 5 pts

+ 5 pts Correct

✔ **+ 0 pts** No git invitation or link attached

Regrade Request **Submitted on: Feb 20**

Hi there! We tried to grant permissions for this but I think the invitation did not go through. However, we did create the associated repositories on the day team matching happened and we can provide proof if needed.

I appreciate that you created the repos on time, but the requirement of the assignment was that the instructors should have access when it was graded, and we did not. I have since received the invitation to your repo and accepted it.

Reviewed on: Feb 20

Question 10

Access granted to team's Google Drive folder

Resolved **0** / 5 pts

+ 5 pts Correct

✔ **+ 0 pts** no google drive invitation

Regrade Request **Submitted on: Feb 20**

Hi there! We tried to grant permissions for this but I think the invitation did not go through. However, we did create the associated drive on the day team matching happened and we can provide proof if needed.

I appreciate that you created your Google Drive folder, but the requirement in the assignment was to share it with us by the time we graded the assignment. We did not have access at that time. I have since received the invitation and am able to now access your folder.

Questions assigned to the following page: 2, 4, 1, and 3

Expectations
We will each contribute 5–7 hours per week on average, and will scale up to 10–12 hours during high-intensity periods like the end of the semester. with the understanding that workload may increase toward the end of the semester. We will attend all scheduled meetings on time and come prepared with updates on their assigned tasks.

If a member has unexpected commitments (such as interviews, illness, or competitions), we will notify the rest as early as possible via iMessage. The team will redistribute tasks temporarily to ensure progress continues. Missed work should be made up when possible once the member is available again. We will account for heavier workload near the end of the semester by planning milestones earlier and avoiding last-minute work whenever possible.

Communication
Our primary communication platform will be iMessage. Team members are expected to respond within 12 hours on weekdays and 24 hours on weekends unless they have informed the group in advance of unavailability.

All members have tested that iMessage notifications are enabled and working. For important announcements, messages will be sent to the full group chat.

Kester(Kester Tan) will be responsible for tracking down teammates who become unresponsive. If a team member does not respond within the expected timeframe, they will be directly contacted.

Meeting Schedule
We will meet once per week for 1 hour at a recurring time agreed upon by all members. Meetings will be held either in person or via Zoom, depending on availability.

Additional meetings may be scheduled near deadlines if needed.

Responsibilities
The project will be split between two entirely separate repositories, one frontend and one backend. Development work will happen on these two separate repositories in parallel. ML research and implementation can happen in parallel with actual backend grading infrastructure.

During meetings:
- Preeya (pkirani@andrew.cmu.edu) will be in charge of taking notes
- Scarlett (Scarlett Huang) will be in charge of organizing and running meetings
- Notes will be shared in a Google Drive accessible to all members

Equitable Contribution & Conflict Resolution

Questions assigned to the following page: 5 and 6

If a team member is contributing too little:

1. The issue will first be discussed privately with the member
2. If the issue persists, it will be brought up in a full team discussion
3. If no improvement occurs after these steps, the issue will be escalated to the instructors

To raise teamwork concerns, members should first communicate respectfully within the team before raising it to instructors.

In the case of an irresolvable conflict between team members, the team will:

1. Separate responsibilities so conflicting members can work independently where possible.
2. Continue communicating through written updates rather than direct confrontation.
3. Prioritize project completion and documentation over personal disagreements.

Even in these situations, all members are expected to continue contributing to their tasks so the project can progress.
